

Dear FCC

I wish to protest any restriction on Christian radio stations. I love to listen to old gospel music. How can you make old gospel music secular? You can not bleep out the name Jesus or Christ and not hurt the rhythm of the song. There is one radio station that is all they play is gospel music from the 1930's to the 1940's. There is no commentary other than once an hour there will be a request for financial help. Why should I as a United States Citizen be forced to listen to Beatles or the Rolling Stones when this music does not appeal to me?

When I do listen to music on the road I can not stand to listen to anything but Christian music. I am a professional driver and music helps me to stay alert which in turn keeps those around me safe. If I can not listen to Christian music then I would not listen to anything at all there by putting at risk other motorists around me. You may say why not listen to tapes or cd's? That would be great if I had a tape player or cd player, but I do not. All I have is the radio.

I can not believe how petty you people are that you are willing to deny my freedom to listen to the music or sermons of my choice. How dare you try to make this country into a communist state. I hear that in Russia Christians have more rights there than they do here.

Again I say shame on you.

Douglas Shannon
